PROFESSIONAL SUMMARY

IT undergraduate with hands-on experience in customer support, technical troubleshooting, and IoT-based robotics projects. Passionate about IT Support, Service Desk operations, and end-user assistance. Demonstrates strong communication skills, fast learning ability, and a commitment to delivering high-quality technical assistance in fast-paced environments.

EDUCATION

Bachelor of Information Technology (Hons) ESOFT Metro Campus, Colombo	2022 – 2026 (Expected)
Diploma in Graphic Designing – High Distinction IDM Campus	2022
GCE Advanced Level (A/L) Kirindiwela Central College	2018
GCE Ordinary Level (O/L) Kirindiwela Central College	2015

WORK EXPERIENCE

Customer Support Intern TechSeed Lanka PVT (LTD)	June 2025 – December 2025
- Handled and resolved customer queries efficiently, maintaining high user satisfaction through clear and timely communication. - Performed technical troubleshooting and provided first-level support for end-users. - Documented issues and escalated complex problems to senior team members, ensuring quick resolution.	

PROJECTS

Autonomous Factory Inspection Robot – Individual Project	Aug 2024 – Aug 2025
- Designed and built an autonomous robot capable of independent navigation within factory environments. - Implemented machine condition monitoring, metal hazard detection, and temperature sensing modules. - Integrated IoT connectivity to deliver real-time alerts and status updates to remote monitoring systems.	
Smart Access Control System – Individual Project (Smart Systems Module)	December 2026
- Developed a smart access control system using RFID and PIN-based dual authentication. - Programmed embedded microcontrollers to manage authentication logic and access events.	
Smart Traffic Light System & R/C Cars – Group Project (Embedded Systems)	Oct 2025 – Nov 2025
- Collaborated in a team to implement a smart traffic light system with sensor-based automation. - Integrated R/C car modules to simulate real-world traffic and test system responsiveness.	
IoT-Based Aroma Remover – Group Project (IoT Module)	December 2024
- Developed an IoT-enabled aroma removal system with remote monitoring and control capabilities. - Applied sensor integration and wireless communication protocols for real-time operation.	

SKILLS

Technical Skills: IoT Systems, Embedded Systems, Robotics, RFID, Sensor Integration, Technical Support, Troubleshooting, End-User Support, IT Support, Customer Relationship Management (CRM), Customer Service Software

Soft Skills: Creative Thinking, Analytical Reasoning, Leadership, Teamwork, Time Management, Communication, Fast Learner, Friendly & Supportive Approach

Tools & Platforms: GitHub, IoT Platforms, Graphic Design Tools (Adobe Suite), Microsoft Office

ACHIEVEMENTS

- ESOFTHINKFEST Hackathon 2025 – Second Runner-up, Robotics Category
